

Council of AI

Regulator brief - labour & AI-economy indices remain UNMEASURED

CSOAI Ltd | UK Companies House 16939677 | Measurement, not certification

NEXT_300 #149

What we publish today

GSPC scoreboard GET /api/gspc - MEASURED (13 of 14 axes), Ed25519

AI Economy Index - UNMEASURED measured_score null

Human Labour Index - UNMEASURED measured_score null

Humanoid Labour Index - UNMEASURED measured_score null

Catalog API GET /api/indices - register UNMEASURED

What we refuse

Invent wage % / displacement % / TVL / TAM as MEASURED labour scores

Fuse index numbers into GSPC grading cells

Certify compliance, issue badges, or sell grades

Why empty cells are honest

Absence is not zero. Until INDEX-METHOD-0.1 freezes an input bank and usable n, the product stays UNMEASURED. REPORTED citations only.

Verify without an account

<https://councilof.ai/gspc-scoreboard>

/gspc-verify /indices GET /api/corrections

Hub vs product honesty

Some HF csoai/* experiment files may label MEASURED-INDEX-v0.1.

Council OS product surface remains UNMEASURED (C-2026-0826-01).
